High performance Polycarboxylate Superplasticizers beton additives

High performance Polycarboxylate Superplasticizers beton additives designed for highest concrete quality. It enables concrete to be produced highly workable at low dosage with improved slump retention. Compared to traditional Superplasticizers, It has higher water reduction, long slump retention, and higher early strength than others.

Cautions

High performance Polycarboxylate Superplasticizers beton additives Cannot be added together with rosin soup air entrainer.

High performance Polycarboxylate Superplasticizers beton additives Cannot be kept in metal container for too long.

When mixing and measuring the slump loss, be aware that it takes longer time to be in effect than naphthalene admixtures.

Do not mix with naphthalene-based admixture. If other admixtures, such as ser retardar or corrosion inhibiting admixtures, are required simultaneously for some special project compatibility tests should be conducted before hand.

After setting aside for long time (over one month), please fully mix

before using.

Our Advantages

1.QUALITY

Quality is priority. We always pay high attention to quality control from buying raw materials to get the finished product.

2.PRICE

We are chemical factory in China. So we can provide wholesale price.

3.PACKAGE

Different packaging can be supplied according to customer's requirement

4.TRANSPORT

We have stock warehouse near port,and can ship conveniently through the Qingdao port.
